## Work Experience

### DXC Technology

#### ● CSTB ( > 1 year)

- Designing new screens and fixing existing bugs on an established website to enhance the user experience. Taking initiative in identifying issues and implementing effective solutions, resulting in a measurable improvement in user satisfaction.
- Providing REST APIs to Frontend teams and third-party applications
- Optimizing existing APIs up to 8 times more performance

Team size: 4

Front (**Angular**) - Back (**.Net C#**) – Database (**MongoDB**)

#### ● DXC internal project ( 1 year )

- Led a team of 6 interns to design and develop an IoT B2B marketplace from scratch, resulting in a successful product launch.

Team size: 9

Front (**React**, **Bootstrap**) - Back (**Node.js**, **AWS Serverless**) – Database (**DynamoDB**)

#### ● Sanofi ( 3 months )

- Proposed solutions based on user demands and technical limits to improve the user experience.
- Automated data processing and integrated SAP REST APIs.
- Contributed to the development of Power Apps-based applications and automated processes using Power Automate.

Team size: 2

Front (**Power Apps**) - Back (**Power Apps & Automate**) – Database (**SAP**)

#### ● Orange ( ~ 2 years )

- Deployed a DevOps pipeline as part of a V-cycle TMA.
- Led an intern to develop a dashboard to monitor DevOps pipeline activities and generate packaging requests.
- Designed screen templates and participated in the development process.

Team size: 4

Front (**Vue.js**, **Bootstrap**) - Back (**Laravel**) – Database (**Oracle**)
